No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1993 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 303

Number 1, May 15, 1993

RESEARCH REPORT

Synthesis and Degradation of Cyclic AMP in Cultured Carrot Cells Treated with Forskolin

Fumiya Kurosaki, Hiroshi Kaburaki, and Arasuke Nishi 177

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

Participation of P450 3A Enzymes in Rat Hepatic Microsomal Retinoic Acid 4-Hydroxylation

Robert Martini and Michael Murray 57

Detection and Characterization of a Novel Hepatic 8 S Binding Protein for Benzo[a]pyrene Distinct from the Ah Receptor

Pierre Lesca, Bogumila Peryt, Sylvie Soues, Patrick Maurel, and Jean-Pierre Cravedi 114

Inhibition of Protein Radical Reactions of Ferrylmyoglobin by the Water-Soluble Analog of Vitamin E, Trolox C

Cecilia Giulivi and Enrique Cadenas 152

The Hydroxylation of Plant Diterpene Analogues by the Fungus *Syncephalastrum racemosum*

Radka Milanova and Margo Moore 165

Evidence That Catalase Is a Major Pathway of Ethanol Oxidation *in Vivo*: Dose-Response Studies in Deer Mice Using Methanol as a Selective Substrate

Blair U. Bradford, Casandra B. Seed, Jeffrey A. Handler, Donald T. Forman, and Ronald G. Thurman 172

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

Induction of *Schistosoma mansoni* Glutathione S-Transferase by Xenobiotics

Elizabeth A. Vande Waa, Christin K. Campbell, Kathleen A. O'Leary, and James W. Tracy 15

The Amino Acid Sequence of *Pseudomonas putida* Azurin

Michael J. Barber, Anthony J. Trimboli, and William S. McIntire 22

Isolation and Characterization of Flavoredoxin, a New Flavoprotein That Permits *in Vitro* Reconstitution of an Electron Transfer Chain from Molecular Hydrogen to Sulfite Reduction in the Bacterium *Desulfovibrio gigas*

Liang Chen, Ming-Yih Liu, and Jean LeGall 44

Vitamin D Deficiency Suppresses Cell-Mediated Immunity *in Vivo*

Shouli Yang, Connie Smith, Jean M. Prahl, Xiaolong Luo, and Hector F. DeLuca 98

Purification and Characterization of Two Phytases from *Escherichia coli*

R. Greiner, U. Konietzny, and Kl.-D. Jany 107

GENE EXPRESSION, TRANSCRIPTION, AND TRANSLATION

Spermidine-Induced Alteration in the Gene-Spacer Discrimination of Nucleases in Protonated DNA

Miklos Gaszner, Lajos Haracska, and Andor Udvardy 1

GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

β 1-3-N-Acetylglucosaminyltransferase in Human Leukocytes: Properties and Role in Regulating Neolactoglycosphingolipid Biosynthesis

Cheryl L. M. Stults and Bruce A. Macher 125

LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS

- Mobility and Molecular Orientation of Vitamin E in Liposomal Membranes as Determined by ^{19}F NMR and Fluorescence Polarization Techniques
Shiro Urano, Mitsuyoshi Matsuo, Tatsumi Sakanaka, Ieaki Uemura, Mayumi Koyama, Itsumaro Kumadaki, and Kenji Fukuzawa 10
- Biosynthesis of Vernoleate (*cis*-12-Epoxyoctadeca-*cis*-9-enoate) in Microsomal Preparations from Developing Endosperm of *Euphorbia lagascae*
Maureen Bafor, Mark A. Smith, Lisbeth Jonsson, Keith Stobart, and Sten Stymne 145

MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS

- The Skeletal Muscle Transverse Tubular Mg-ATPase: Identity with Mg-ATPases of Smooth Muscle and Brain
H. Bradley Cunningham, Paul J. Yazaki, Ronald C. Domingo, Kahuku V. Oades, Heike Bohlen, Roger A. Sabbadini, and A. Stephen Dahms 32
- The Major Binding Protein of the Interferon Antagonist Sarcolectin in Human Placenta Is a Macrophage Migration Inhibitory Factor
Fu-Yue Zeng, Weishui Y. Weiser, Hartmut Kratzin, Bernd Stahl, Michael Karas, and Hans-Joachim Gabius 74
- The Epidermal Growth Factor/cAMP-Inducible EctoCa $^{2+}$ -ATPase of Human Hepatoma Li-7A Cells Is Similar to Rat Liver EctoATPase/Hepatocyte Cell Adhesion Molecule (Cell-CAM 105)
Jian-ping Gao and Aileen F. Knowles 90

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

- Localization of Free and Bound Biotin in Cells from Green Pea Leaves
Pierre Baldet, Claude Alban, Stella Axiotis, and Roland Douce 67
- The Effects of Castanospermine and Swainsonine on the Activity and Synthesis of Intestinal Sucrase
Y. T. Pan, John Ghidoni, and Alan D. Elbein 134

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- Fibrinogen Binds to Heparin: The Relationship of the Binding of Other Adhesive Proteins to Heparin
Hiroshi Mohri and Takao Ohkubo 27
- Deoxyribonuclease of *Syncephalastrum racemosum*—Enzymatic Properties and Molecular Structure
Ling-Yun Chen, Heng-Chien Ho, Ying-Chieh Tsai, and Ta-Hsiu Liao 51
- Hormonal Regulation of Rat Uterine Collagenase
P. Anuradha and Raghava Varman Thampan 81
- Interaction between the C-Terminal Peptides of Tubulin and Tubulin S Detected with the Fluorescent Probe 4',6-Diamidino-2-phenylindole
Marco Ortiz, Rosalba Lagos, and Octavio Monasterio 159

Number 2, June 1993

PERSPECTIVES IN BIOCHEMISTRY AND BIOPHYSICS

- Structural Thermodynamics: Prediction of Protein Stability and Protein Binding Affinities
Ernesto Freire 181

INVITED PAPER

- In Vivo* Spin Trapping of Xenobiotic Free Radical Metabolites
Kathryn T. Knecht and Ronald P. Mason 185

RESEARCH REPORT

- Nicotinamide Ribose 5'-O-[S-(3-Bromo-2-oxopropyl)]thiophosphate: A New Affinity Label for NMN Sites in Enzymes
Inshik Park, Derya H. Ozturk, Sambanthamurthy Soundar, and Roberta F. Colman 483

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

- Steady-State Kinetics of Ubiquinol-Cytochrome c Reductase in *Saccharomyces cerevisiae* Mitochondria: Effects of Fluidity Changes Obtained by Different Growth Temperatures
Marika Cavazzoni, Jaroslava Svobodova, Aurelio De Santis, Romana Fato, and Giorgio Lenaz 246
- Hydroperoxide-Induced Diacylglycerol Formation and Protein Kinase C Activation in Vascular Endothelial Cells
Mohiuddin M. Taher, Joe G. N. Garcia, and Viswanathan Natarajan 260
- Inhibition of Lung Tissue Oxidation during Ischemia/Reperfusion by 2-Mercaptopropionylglycine
Iraimoudi S. Ayene, Abu B. Al-Mehdi, and Aron B. Fisher 307
- Nitric Oxide Binding to Human Ferrihemoglobins Cross-Linked between Either α or β Subunits
Abdu I. Alayash, Joseph C. Fratantoni, Celia Bonaventura, Joseph Bonaventura, and Robert E. Cashon 332
- Role of Superoxide and Trace Transition Metals in the Production of α -Hydroxyethyl Radical from Ethanol by Microsomes from Alcohol Dehydrogenase-Deficient Deermice
Kathryn T. Knecht, Ronald G. Thurman, and Ronald P. Mason 339
- On the Mechanism of Peroxidase-Catalyzed Oxygen Production
David P. Barr and Steven D. Aust 377
- Studies on Three Reductases Which Have Polycyclic Aromatic Hydrocarbon Quinones as Substrates
Joseph Jarabak and Ronald G. Harvey 394
- Factors Affecting the Species-Homologous and Species-Heterologous Binding of Mitochondrial ATPase Inhibitor, IF₁, to the Mitochondrial ATPase of Slow and Fast Heart-Rate Hearts
William Rouslin and Charles W. Broge 443

BIOPHYSICAL CHEMISTRY AND X-RAY CRYSTALLOGRAPHY

- Separation of Freezing- and Drying-Induced Denaturation of Lyophilized Proteins Using Stress-Specific Stabilization. I. Enzyme Activity and Calorimetric Studies
John F. Carpenter, Steven J. Prestrelski, and Tsutomu Arakawa 456
- Separation of Freezing- and Drying-Induced Denaturation of Lyophilized Proteins Using Stress-Specific Stabilization. II. Structural Studies Using Infrared Spectroscopy
Steven J. Prestrelski, Tsutomu Arakawa, and John F. Carpenter 465

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

- Chemical Modifications of Chicken Liver Pyruvate Carboxylase: Evidence for Essential Cysteine-Lysine Pairs and a Reactive Sulfhydryl Group
Brian G. Werneburg and David E. Ash 214
- Mechanism of Mitogenic Action of Aluminum Ion on Human Bone Cells: Potential Involvement of the Insulin-like Growth Factor Regulatory System
K.-H. William Lau, Suwannee Utrapiromsuk, Aera Yoo, Subburaman Mohan, Donna D. Strong, and David J. Baylink 267
- Escherichia coli* Leader Peptidase: Production of an Active Form Lacking a Requirement for Detergent and Development of Peptide Substrates
David W. Kuo, H. Karen Chan, Carol J. Wilson, Patrick R. Griffin, Hollis Williams, and Wilson B. Knight 274
- The Role of Divalent Magnesium in Activating the Reaction Catalyzed by Orotate Phosphoribosyltransferase
Mohit B. Bhatia and Charles Grubmeyer 321
- Identification and Perturbation of Mutant Human Fibroblasts Based on Measurements of Methylmalonic Acid and Total Homocysteine in the Culture Media
J. Fred Kolhouse, Sally P. Stabler, and Robert H. Allen 355
- Expression and Characterization of Rat Protein Phosphatases-1 α , -1 γ 1, -1 γ 2, and -1 δ
Zhongjian Zhang, Ge Bai, Miroshi Shima, Sumin Zhao, Minako Nagao, and Ernest Y. C. Lee 402
- Purification and Properties of a Human Platelet Inositol 1,4,5-Trisphosphate 3-Kinase
Anning Lin, Robert W. Wallace, and Stephen Barnes 412

GENE EXPRESSION, TRANSCRIPTION, AND TRANSLATION

- Cytochrome P450 2B Enzyme (CYP2B) Induction Defect Following Phenobarbital Treatment in the fa/fa Zucker Rat: Molecular Characterization *Robert A. Blouin, Abhik M. Bandyopadhyay, Inder Chaudhary, Larry W. Robertson, Brian Gemzik, and Andrew Parkinson* 313
- The Structure of Two Murine Class-Mu Glutathione Transferase Genes Coordinately Induced by Butylated Hydroxyanisole *John Reinhart and William R. Pearson* 383

GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

- Cultured Ehrlich Ascites Tumor Cells Show Increased N-linked α 2,6-Sialyltransferase Activity *M. K. Mostafapour and Irwin J. Goldstein* 255
- Structural Analysis on the Sugar Chains of Human α_1 -Antitrypsin: Presence of Fucosylated Biantennary Glycan in Hepatocellular Carcinoma *Atsushi Saitoh, Yutaka Aoyagi, and Hitoshi Asakura* 281

LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS

- Polyunsaturated Fatty Acid Metabolism and Acetylated Low Density Lipoprotein Uptake in J774A.1 Cells *Genshou Shichiri, Masahiko Kinoshita, and Yukikazu Saeki* 231
- The Effect of Carbohydrate Removal on Stability and Activity of Saposin B *Masao Hiraiwa, Shinji Soeda, Brian M. Martin, Arvan L. Fluharty, Yoshio Hirabayashi, John S. O'Brien, and Yasuo Kishimoto* 326
- α -Tocopherol Uptake and Its Influence on Cell Proliferation and Lipid Peroxidation in Transformed and Non-transformed Baby Hamster Kidney Cells *Christopher E. P. Goldring, Catherine A. Rice-Evans, Roy H. Burdon, Ramalingeshwara Rao, Inam Haq, and Anthony T. Diplock* 429

MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS

- Net Adenine Nucleotide Transport in Rat Kidney Mitochondria *Thilo Hagen, John L. Joyal, Wolfgang Henke, and June R. Aprille* 195
- Biosynthetic and Structural Studies on Thy-1 in a Rat Neuronal Tumor Cell Line *L. S. Wilkerson and Oscar Touster* 238
- Calcium- and Lead-Activated Morphological Changes in Human Erythrocytes: A Spin Label Study of the Cytoplasm *L. E. Göran Eriksson and Håkan Beving* 296
- Calcyclin-Binding Site Located on the NH₂-Terminal Domain of Rabbit CAP-50 (Annexin XI): Functional Expression of CAP-50 in *Escherichia coli* *Hiroshi Tokumitsu, Akihiro Mizutani, and Hiroyoshi Hidaka* 302
- Calcium Pretreatment Induces the Decrease in Epidermal Growth Factor Binding through the Activation of Transglutaminase in Isolated Liver Membrane *Shinsuke Katoh, Minako Hashimoto, Hiroyuki Kohno, and Yasuhito Ohkubo* 421
- Characterization of the Cellular Reduction of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyltetrazolium bromide (MTT): Subcellular Localization, Substrate Dependence, and Involvement of Mitochondrial Electron Transport in MTT Reduction *Michael V. Berridge and An S. Tan* 474

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- The Two Cysteine Endopeptidases of Legume Seeds: Purification and Characterization by Use of Specific Fluorometric Assays *Asha A. Kembhavi, David J. Buttle, C. Graham Knight, and Alan J. Barrett* 208
- The Construction and Expression of Chimeric Urokinase-Type Plasminogen Activator Genes Containing Kringle Domains of Human Plasminogen *Ariel Boutaud and Francis J. Castellino* 222
- Inactivation of Yeast Hexokinase by Cibacron Brilliant Red 3B-A *Rajinder N. Puri and Robert Roskoski, Jr.* 288

Molecular Diversity of Calpastatin in Human Erythroid Cells <i>Emiko Takano, Tetsuya Nosaka, Woon Joo Lee, Kishiko Nakamura, Takayuki Takahashi, Masaaki Funaki, Hiromu Okada, Masakazu Hatanaka, and Masatoshi Maki</i>	349
A Novel Polymorphism of Human Serum Amyloid A Protein, SAA1 γ , Is Characterized by Alanines at Both Residues 52 and 57 <i>Satoshi Baba, Toshie Takahashi, Takeshi Kasama, Michio Fujie, and Haruyuki Shirasawa</i>	361
The Serine Protease Inhibitor Family from <i>Ascaris suum</i> : Chemical Determination of the Five Disulfide Bridges <i>Vincent D. Bernard and Robert J. Peanasky</i>	367
The Inhibition of Trypsin and α -Chymotrypsin Proteolytic Activity by Aluminum(III) <i>P. Zatta, C. Bordin, and M. Favarato</i>	407
Isolation by a New Method and Sequence Analysis of Chromosomal HMG-17 Protein from Porcine Thymus <i>Vassiliki A. Boumba, Orestes Tsolas, Dora Choli-Papadopoulou, and Konstantin Seferiadis</i>	436
Relationship between Iron and Phosphate in Mammalian Ferritins <i>Deepika de Silva, Jia-Hsin Guo, and Steven D. Aust</i>	451
AUTHOR INDEX FOR VOLUME 303	489

NOTICE

The Subject Index for Volume 303 will appear in the December 1993 issue as part of a cumulative index for the year 1993.

Digitized by the Internet Archive
in 2026

Archives of BIOCHEMISTRY AND BIOPHYSICS is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Research Reports** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Research Reports provide a mechanism for rapid publication of short but complete manuscripts on outstanding and novel research findings. They should consist of 1000 or fewer words of text and a total of six or fewer figures and tables. The first paragraph should describe, without abbreviations, the background, rationale, principal findings, and conclusions of the study. Experimental methods should be reported in the table or figure legends, not in the text. Acknowledgments may be included in a footnote to the title. Omit the abstract and text subheadings, and keep literature citations to a reasonable minimum. The scientific quality of these reports should be of the highest caliber to facilitate rapid review. Authors should identify the manuscript as a Research Report and submit it directly to the Editorial Office of the journal (see below).

Accelerated status may also be given to those manuscripts that are reviewed as outstanding and that require little or no revision. At submission, authors may request accelerated publication of their manuscript. To expedite publication of such articles, authors will not receive proofs.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of BIOCHEMISTRY AND BIOPHYSICS

Editorial Office, Third Floor, 1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

For nucleotide sequence data authors are encouraged to submit original nucleotide or amino acid sequence data to a databank such as GenBank or EMBL. A footnote that includes the accession number should be included on the title page. It is preferable that the sequence data be deposited either prior to submission or by the time of acceptance of the manuscript. However, a footnote can be added at the proof stage if the material is deposited after acceptance. For further information

please contact the editorial office or GenBank or EMBL directly.

Policy regarding publication of experiments on unanesthetized animals conforms with the standards for use of laboratory animals established by the Institute of Laboratory Animal Resources, U.S. National Academy of Sciences. Experiments in which curariform agents are used must be justified and details of the steps taken to reduce or avoid distress to the animal must be provided, particularly with regard to electrical stimulation.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in **Archives**, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in **Archives** represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

¹ An extended Instructions to Authors is published in the January issue of **Archives of BIOCHEMISTRY AND BIOPHYSICS**. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUBMB rules and recommendations, and accepted abbreviations.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of $8\frac{1}{2} \times 11$ -in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations and P450 Reactions
Glycoconjugates and Oligosaccharides; Proteoglycans and Extracellular Matrices
Lipids, Lipid Mediators, and Glycolipids
Biophysical Chemistry and X-Ray Crystallography
Membrane Proteins and Transport; Intracellular Signals; Cytokines and Receptors
Enzyme Structure and Mechanisms; Cellular Regulation; Phosphorylation and Dephosphorylation
Plant Biochemistry and Molecular Biology
Protein Structure and Function; Proteases, Protein Turnover, and Post-translational Processing
Gene Expression, Transcription, and Translation

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name, complete mailing address, and telephone and fax numbers of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (*^{a,b}*, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5×7 -in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page ($7\frac{1}{8} \times 9$ in.; column width, $3\frac{1}{2}$ in.) and submitted no larger than $8\frac{1}{2} \times 11$ in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Cover photographs. Suggestions for *cover photographs* are welcome. Submit them as slides with $8\frac{1}{2} \times 11$ -in. color or black-

and-white prints to accompany specific articles. A short (one-line) legend should accompany each photograph.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of the most recent edition of *Chemical Abstracts Service Source Index*. Please note the following examples.

1. Gemzik, B., Green, J., and Parkinson, A. (1992) *Arch. Biochem. Biophys.* **296**, 355–365.
2. Stein, W. D. (1986) *Transport and Diffusion across Cell Membranes*, Academic Press, San Diego.
3. Compton, T. (1990) in *PCR Protocols: A Guide to Methods and Applications* (Innis, M. A., Gelfand, D. H., Sninsky, J. J., and White, T. J., Eds.), pp. 39–45, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

Personal computer disks. Manuscripts may be submitted to **Archives of BIOCHEMISTRY AND BIOPHYSICS** on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in these Instructions to Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).
